

Managing your money using Value Investing principles!

A couple of updates relating to Parag Parikh Flexi Cap Fund's portfolio

Mr. Rajeev Thakkar
CIO & Director

Here is a bit of a technical discussion and not very material. Investors can ignore the following if they are not very familiar with derivatives and it does not meaningfully impact the way the portfolio is constructed.

- 1. Currency hedging:** We have usually been hedging a majority of the dollar rupee exposure for our overseas investments using currency futures contracts on exchanges. There has been a recent regulatory change because of which trading volumes on the exchanges and open interest in these contracts has significantly come down. While our transactions were for hedging purposes and we could continue to do them even under the new regulations, the market for these contracts has become very illiquid. To illustrate, the average trading volume on the last 3 trading days in January 2024 was about Rs. 24,494 crores per day. This has come down to about Rs. 8,695 crores per day in the last 3 trading days of April 2024. Given the drying up of volumes, we are no longer hedging the currency exposure. This is not expected to meaningfully affect the portfolio returns. There may be a slight change in the volatility profile because of currency fluctuations. The impact of this will be very marginal.
- 2. NIFTY call options:** The implied volatility on longer dated (December 2024) Nifty Call options had fallen to very low levels. This meant that instead of buying equities, one could buy the options and invest the rest of the money in money market securities. Here the interest income on the money market securities will make up most of the premium paid for the call options. At the end of the period (December 2024) one will get the upside of equities - if markets are up. And if for some reason, the markets were to fall, the downside is limited. The amount invested in this is not very significant, neither in terms of the premium paid nor in terms of the underlying Nifty value. The underlying NIFTY value is roughly 0.13% of the portfolio value.

Disclaimer: Views expressed here are based on information available in the public domain currently. Views expressed here can change depending on change in circumstances. Nothing discussed here constitutes a buy/ sell/ hold recommendation.

Rajeev Thakkar

Chief Investment Officer and Director

Parag Parikh Flexi Cap Fund

Parag Parikh ELSS Tax Saver Fund

An open-ended equity linked saving scheme with a statutory lock in of 3 years and tax benefit

An India-centric Scheme suitable for long-term capital appreciation

Parag Parikh ELSS Tax Saver Fund

India-centric Scheme

↳ At least **80%** of the Parag Parikh ELSS Tax Saver Fund's corpus will be invested in Indian equities.

It has the freedom to:

↳ Invest in stocks of small, medium and large-sized Companies based in India.

↳ Invest in any sector or industry within India which appears to be attractively valued

↳ Participate in buy-backs and other special situations within India.

About the Scheme...

It is an open-ended Equity Linked Savings Scheme (ELSS) with a statutory lock-in of 3 years and tax benefit from the date of investment for every investment instalment.

Indian investors who opt for old regime of income tax and invest in this Scheme are eligible for Income Tax deduction u/s 80C upto a sum of Rs. 1.50 lakhs[^]. However, this is not a ceiling. Amounts beyond that can also be invested in the Scheme

While the income tax relief is certainly beneficial to many, the Scheme's other attributes mean that it could also be attractive to those who have exhausted this limit.

Also, we have always maintained that equity investments are best suited for investors who can remain invested for at least five years. The three year lock-in in Parag Parikh ELSS Tax Saver Fund is much lower than this, and therefore should not deter you.

It enjoys the same Capital Gains Tax benefits as available to other equity oriented schemes (viz. Gains will be taxed at a flat rate of 10%*)

*As per Income Tax Rules prevailing for the Financial Year 2023-24

Parag Parikh Dynamic Asset Allocation Fund

An open-ended dynamic asset allocation fund

Type of Instruments	Normal Allocation (% of Net Assets)	Risk Profile
Equities & Equity related instruments	0-100	Very High
Debt securities & Money Market instruments including Units of Debt oriented mutual fund schemes	0-100	Low to Moderate

The fund will predominantly invest in debt instruments and endeavour to maintain equity allocation between 35% and 65% (some of it will be hedged via approved derivative instruments as permitted by SEBI from time to time)

Note: Please refer to the [Scheme Information Document](#) of the Scheme for detailed asset allocation

Entry Load	Not Applicable
Exit Load	In respect of each purchase / switch-in of Units, 10% of the units ("the limit") may be redeemed without any exit load from the date of allotment. Any redemption or switch-out in excess of the limit shall be subject to the following exit load: - Exit load of 1.00% is payable if Units are redeemed / switched-out within 1 year from the date of allotment of units. - No Exit Load is payable if Units are redeemed / switched-out after 1 year from the date of allotment. Any exit load charged (net off GST, if any) shall be credited back to the Scheme.

Key Features of our Investment Strategy:

Fixed Income Investments

- A relatively wide mandate permits us to include both, 'accrual' and 'duration' related instruments in our portfolio.
- We will retain the flexibility to invest in the entire range of debt securities - Sovereign, State Government, PSU and corporate securities across all maturities - (including securitised debt) and money market instruments.
- Investment in debt securities will be guided by credit quality, liquidity, interest rates and their outlook.

Equity Investments

- Focus on choosing stocks possessing a 'margin-of-safety'
- Preference for stocks with strong cash flows (higher Income Distribution cum capital withdrawal payout/buybacks)
- Avail of 'special situations' as well as arbitrage opportunities, whenever they arise

Taxation

Investors are advised to refer to the Section on 'Taxation on investing in Mutual Funds' in the 'Statement of Additional Information' and to consult their own tax advisors with respect to the specific amount of tax and other implications arising out of their participation in the Scheme

Plans

Direct and Regular

Options

Growth

Income Distribution cum Capital Withdrawal Option (IDCW) :

Monthly Reinvestment of Income Distribution cum capital withdrawal option

Monthly Payout of Income Distribution cum capital withdrawal option

Minimum amounts

Initial purchase - Rs 5,000 and any amount thereafter

Additional purchase - Rs 500 and any amount thereafter

Systematic Investment Plan (SIP)

Monthly - 6 installments of Rs. 1000/- each and any amount thereafter

Quarterly - 4 installments of Rs.3000/- each and any amount thereafter

Expense Ratio:

Regular Plan: 0.61% p.a.

We recommend it to those:

- Desiring debt allocation with indexation benefits
- Preferring to outsource the task of managing the complexities involved in debt investing.
- Who refrain from actively trading in debt securities with the intention of profiting from interest-rate movements

PPFAS 
MUTUAL FUND
There's only one right way®

Mutual Fund investments are subject to market risks, read all scheme related documents carefully.

Scheme Facts

Entry Load: Not Applicable.

Exit Load:

- In respect of each purchase / switch-in of units, an Exit Load of **0.25%** is payable if Units are redeemed/switched-out **within 30 days** from the date of allotment.
- **No Exit Load** is payable if Units are redeemed / switched-out **after 30 days** from the date of allotment.

Inter scheme switch: At the applicable load in respective scheme
Any exit load charged (net off GST, if any) shall be credited back to the Scheme.

Capital Gains Tax treatment

As per current provisions, capital gains earned in **PPAF** will be taxed at par with equity-oriented' mutual funds.

Subscription Amounts

Initial purchase - Rs 1,000 and in multiples of Re 1 thereafter

Additional purchase - Rs 1,000 and in multiples of Re 1 thereafter

Monthly SIP: Rs. 1,000 and in multiples of Re. 1 thereafter.

Quarterly SIP: Rs. 3,000 and in multiples of Re. 1 thereafter.

Redemption - Rs. 1,000 or 1 unit or account balance whichever is lower

It may suit you:

In case you are largely risk-averse and are seeking relatively 'low risk' returns, unaffected by market cycles.

Not seeking a fixed amount of income every month

In an income tax bracket which benefits from the relatively 'tax-advantaged' status which Arbitrage Funds enjoy compared to 'non equity-oriented Funds'.

Is this Scheme 'right' for you?

It may not suit you:

In case you are seeking returns equivalent to those offered by 'equity oriented Funds'. Over longer time periods, these may be higher than those offered by Arbitrage Funds... but are also more volatile.

Seeking to earn a fixed amount of income every month

In an income tax bracket which may not benefit from the relatively 'tax-advantaged' status which Arbitrage Funds enjoy compared to 'non equity oriented Funds'.

Asset Allocation:

Type of Instruments

Equities & Equity derivatives (Equity Hedged exposure)

Debt securities & Money Market instruments including margin money deployed in derivatives transactions

Normal Allocation (% of Net Assets)

65 - 100

0 - 35

Risk Profile

Low to Medium

Low to Medium

Note: Please refer to the [Scheme Information Document \(SID\)](#) of the scheme for detailed asset allocation.

Definitions

Fund Manager	An employee of the asset management company such as a mutual fund or life insurer, who manages investment of the scheme. He is usually part of a larger team of fund managers and research analysts.
Application amount for fresh subscription	This is the minimum investment amount for a new investor in a mutual fund scheme.
Minimum additional amount	This is the minimum investment amount for an existing investor in a mutual fund scheme.
SIP	SIP or systematic investment plan work on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests Rs. 500 every 15 th of the month in an equity fund for a period of three years.
NAV	The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.
Benchmark	A group of securities, usually a market index whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmark include the Nifty, Sensex, BSE 200, BSE 500, 10-year Gsec.
Entry Load	A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchase the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is Rs.100 and the entry load is 1%, the investor will enter the fund at Rs 101.
Exit Load	Exit load is charged at the time of redeeming (or transferring an investment between schemes). The exit load percentage is deducted from the NAV at the time of redemption (or transfer between schemes). This amount goes to the respective scheme and gets added to the AUM of that Scheme
Standard Deviation	Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund Scheme has a high standard deviation, its range of performance is wide implying greater volatility.
Sharpe Ratio	The Sharpe Ratio named after its founder, the Nobel Laureate William Sharpe is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.
Beta	Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.
AUM	AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.
Holdings	The holding or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in term of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.
Nature of Scheme	The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.
Portfolio Turnover Ratio	A measure of how frequently assets within a fund are bought and sold by the managers. Portfolio turnover is calculated by taking either the total amount of new securities purchased or the amount of securities sold - whichever is less - over a particular period, divided by the total net asset value (NAV) of the fund. The measurement is usually reported for a 12-month time period.
Yield to Maturity (YTM)	The yield to maturity (YTM) of a bond or other fixed-interest security, such as gilts, is the (theoretical) internal rate of return (IRR, overall interest rate) earned by an investor who buys the bond today at the market price, assuming that the bond is held until maturity, and that all coupon and principal payments are made on schedule.
Modified Duration	Modified duration is a formula that expresses the measurable change in the value of a security in response to a change in interest rates. Modified duration follows the concept that interest rates and bond prices move in opposite directions.
Total Expense ratio	The total expense ratio (TER) is a measure of the total cost of a fund to the investor. Total costs may include various fees (purchase, redemption, auditing) and other expenses. The TER, calculated by dividing the total annual cost by the fund's total assets averaged over that year, is denoted as a percentage.
Derivative	Derivative includes (i) a security derived from a debt instrument, share, loan whether secured or unsecured, risk instrument or contract for differences or any other form of security; (ii) a contract which derives its value from the prices, or index of prices, or underlying securities.
